

Ideation Phase

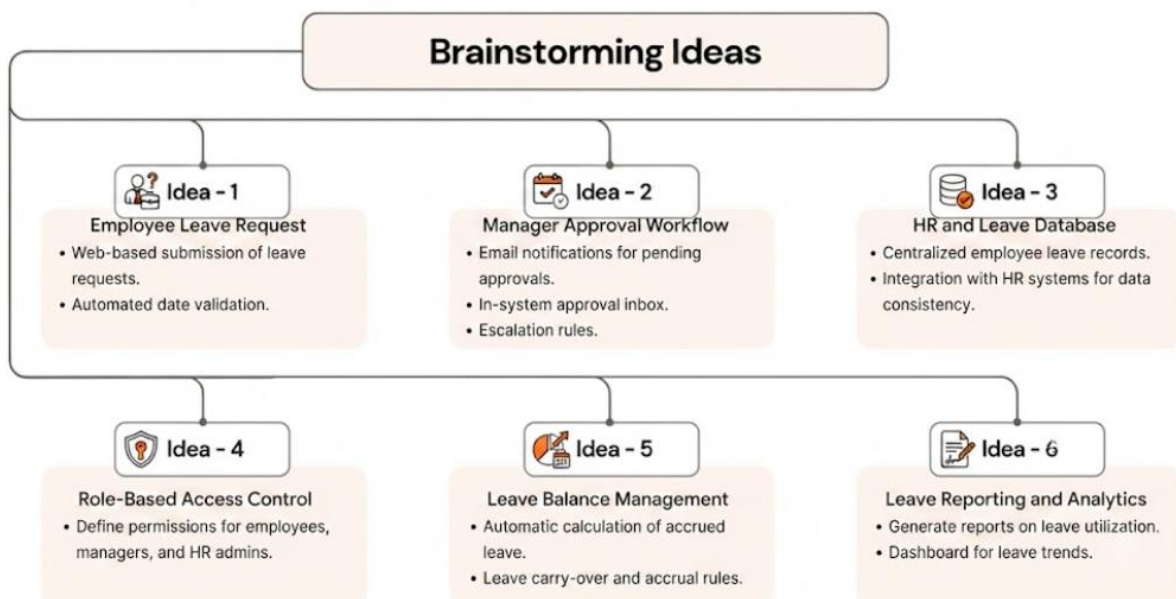

Brainstorm & Idea Prioritization

Date	29-06-2026
Team ID	23A51A05H9
Project Name	Automated Network Request Management
Maximum Marks	4 Marks

Brainstorming and Idea Listings:

Brainstormed Features

Key Objectives

Accelerate Approvals: Streamline the end-to-end workflow to significantly cut down the time it takes for a manager to review and approve requests.

Prevent Scheduling Errors: Implement automated date validation rules to completely eliminate human errors, such as selecting an end date earlier than a start date.

Enhance Transparency: Provide employees and managers with instant, real-time visibility into application statuses and updates right inside ServiceNow.

Centralize Leave Tracking: Transition away from scattered emails or spreadsheets into a single, fully digital system of record.

Implementation Map
